

# 2015 Product Catalog

NATIONAL *Tree* COMPANY®

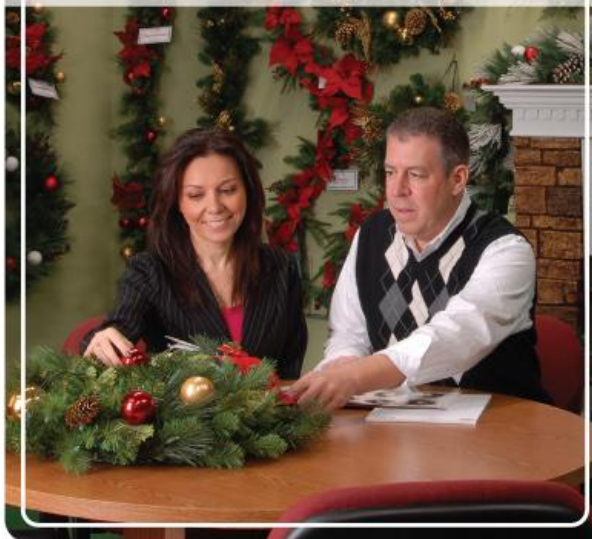

### Corporate Headquarters

Located in Cranford, New Jersey, our headquarters site includes two product showrooms, fully-staffed customer service department and warehouse facility.

### Product Showrooms

Our Cranford and Hong Kong showrooms contain a diverse selection of holiday decorations arranged to display the finely-crafted products only National Tree Company can bring you.

### Customer Service

Our trained, courteous and multilingual customer service staff is ready to assist with product questions and parts orders.

### Warehousing & Fulfillment

We maintain warehouse facilities to accommodate small order quantities and provide internet fulfillment.

All trees shown in the Floor Tree section feature hinged branch construction. Many of these tree styles are available from stock in alternate heights, widths and lighting options. Please consult our Price List for details.

Below are descriptions of the varying technologies utilized in many of our products. The logo/icon image will appear next to the products shown that feature these technologies.

### FEEL-REAL® Branch tips

Throughout the catalog you will see the FEEL-REAL® logo indicating that the item has the addition of **PE branch tips**. PE (polyethylene) tips give these trees and greenery a realism that best mirrors nature's design. PE branch tips are crush-resistant and molded from real tree branches.

### Dual Color® Lights

Our Dual Color light system features low voltage LED bulbs that change from warm white to multicolor and includes a switch to control **nine different light colors and actions**. These long lasting and energy-efficient bulbs also hold the prestigious Energy Star certification in both the US and Canada.

The nine Dual Color functions are:

- Steady Warm White • Steady Multicolor • Fading Warm White
- Fading Multicolor • Fading Warm White to Multicolor
- Flashing Warm White • Flashing Multicolor
- Flashing Warm White to Multicolor (slow speed)
- Flashing Warm White to Multicolor (fast speed)

### Battery-Operated with Timer

All items with this icon are pre-lit with battery-operated low voltage LED lights. Each battery pack features an integrated **6 hours ON / 18 hours OFF timer** to control lights. There are three battery pack designs depending on the product type: 3AA, 3D straight and 3D curved. All battery operated products are rated for outdoor use.

### LED Lights

Many of the products shown are pre-lit with energy-efficient and **long lasting** LED lights. LED bulbs have an outstanding operational life expectancy of up to 50,000 hours and use only 1.5 watts of energy per hundred lights compared to incandescent bulbs which use 42 watts. The icon shown here will quickly identify the products pictured in this catalog that are pre-lit with LED lights.

### PowerConnect™

Trees that feature PowerConnect will no longer require the multiple light string and extension cord connections between tree sections. Electrical connections are made through the tree center poles. These **pole-to-pole connections** reduce set-up time and can be configured for low voltage LED or incandescent light sets. *PowerConnect is available on select tree styles. Please refer to our Price List for additional information.*

### Music Match™

The Music Match system is for use with National Tree Company trees pre-lit with low voltage LED lights. The system allows music to be streamed from a **Bluetooth®** capable device causing the lights on the tree to "dance" in sync with the music playing. Light intensity raises and lowers together with sound volume. *Music Match is available on select tree styles. Please refer to our Price List for additional information.*

The Music Match Bluetooth Light System unit will also be available in a retail blister pack.

This catalog shows only products that are stocked in our New Jersey warehouse.
